

Synology Drive

Complete file management solution offering 100% data ownership at zero additional cost.

File management and collaboration solution

Synology Drive brings you seamless file access, reliable synchronization and backup protection for your data, and effective team collaboration features.

Cross-device, cross-platform

Manage files across phone and desktop devices while on the go, using clients for iOS, Android, Windows, and macOS.

Syncing and backup

Set up one-way or two-way syncing to make data distribution a breeze while you protect your data from ransomware or accidental deletion with scheduled or real-time backups. Restores up to 32 historical file versions.

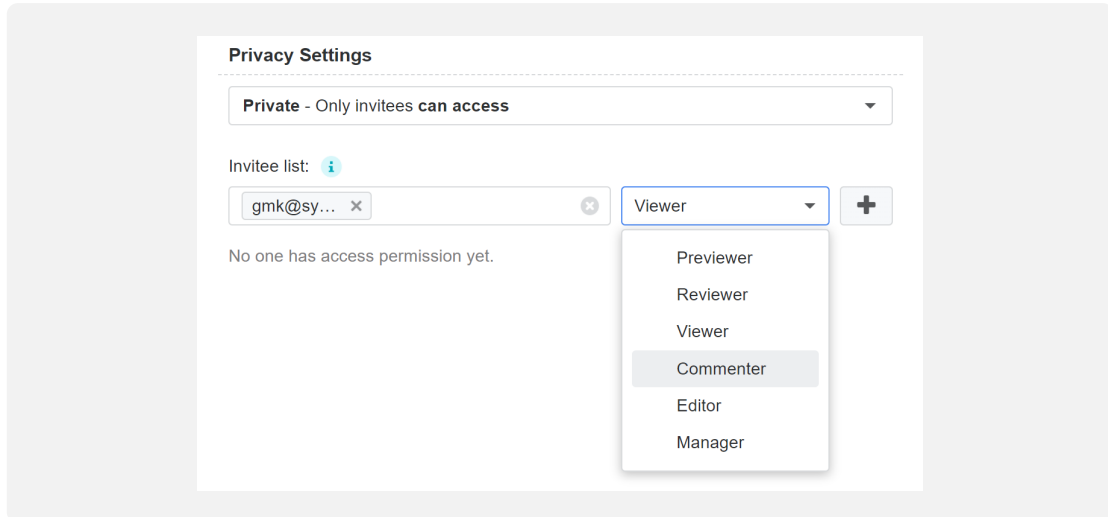

Real-time collaboration

Edit documents, spreadsheets and slides together with Synology Office to enhance teamwork and productivity. Track and manage all files shared externally using powerful admin tools.

Do more with the Synology Drive & Office integration

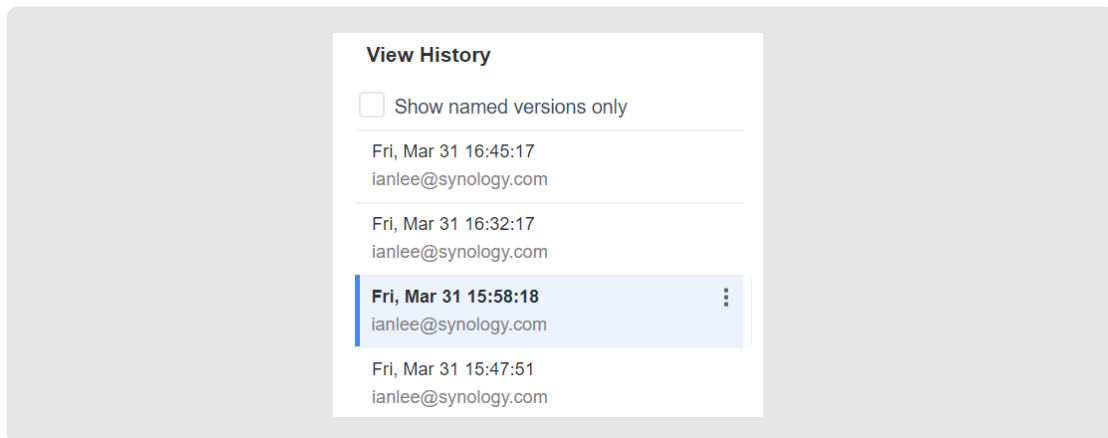

Permission flexibility

Choose from six different levels of permission to ensure information is accessible only to those who need it.

Unlimited versioning

Unlimited file revision history allows users to roll back and restore to any previous versions.

Microsoft Office compatibility

Effortlessly transfer documents, spreadsheets, and slides between your Synology system and Microsoft Office.

Synology Drive vs. Windows File Server and public cloud services

How does Synology Drive compare to other data management solutions?

Windows File Server

Wide compatibility

Compatibility with Windows, macOS, and Linux means you can manage your data using a familiar interface.

Web portal and easy sharing

Access files through the Synology Drive web portal and use share links to collaborate within and outside your organization.

License-free service

With a one-time investment in a Synology NAS, gain access to a complete file management ecosystem free of license charges.

Public cloud

Data privacy

Manage data on your device with Synology Drive, giving you complete ownership of your data.

Faster access speed

Access your files faster with Synology Drive compared with other cloud-based solutions, such as Google Drive, that rely on an internet connection to access files.

No subscription fees

Synology Drive is a service that comes free with Synology NAS devices, while other cloud services charge recurring fees to expand storage.
