

Intelligent Home Surveillance Management

Synology Surveillance Station gives you the control you need at the price you want with comprehensive, intuitive, and license-free surveillance monitoring tools.

Surveillance management that works for you

Get a surveillance system tailored to your needs with smart monitoring and alerts, a broad range of supported cameras, easy access from any device, and surveillance storage that you own.

Own your surveillance

With a Synology NAS as your storage and monitoring hub, you own and control your surveillance footage. <https://sy.to/hsspcam>

Universal access

Watch over your home from anywhere with easy access by web browser, desktop client, or mobile app. <https://sy.to/hssplive>

Smart monitoring

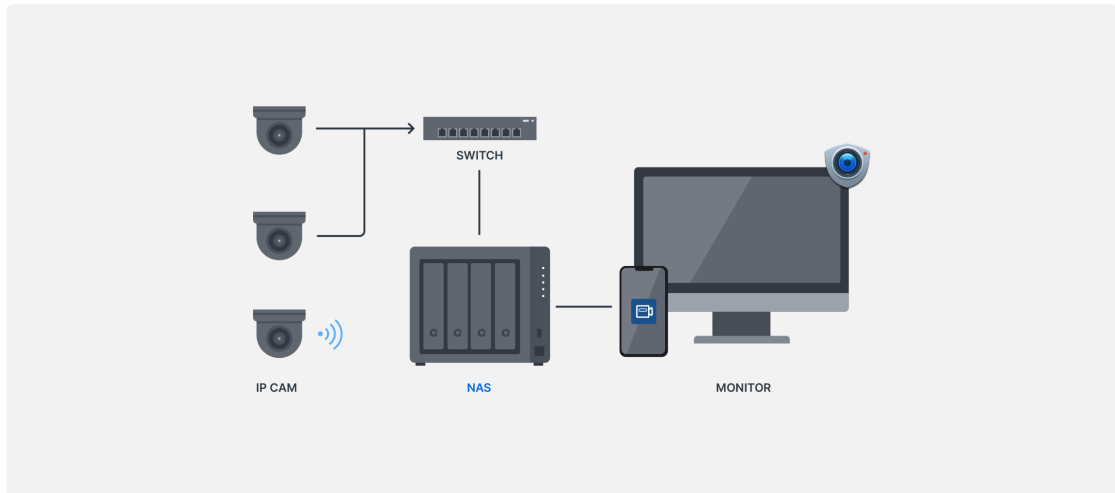

Stay informed with alerts for motion and intrusion detection, camera tampering, and much more. https://www.synology.com/surveillance/feature/live_view_alert

Easy deployment

Setting up a home surveillance system has never been easier. From installing a few basic devices to deploying an advanced system, Synology offers the perfect solution to protect what you value most.

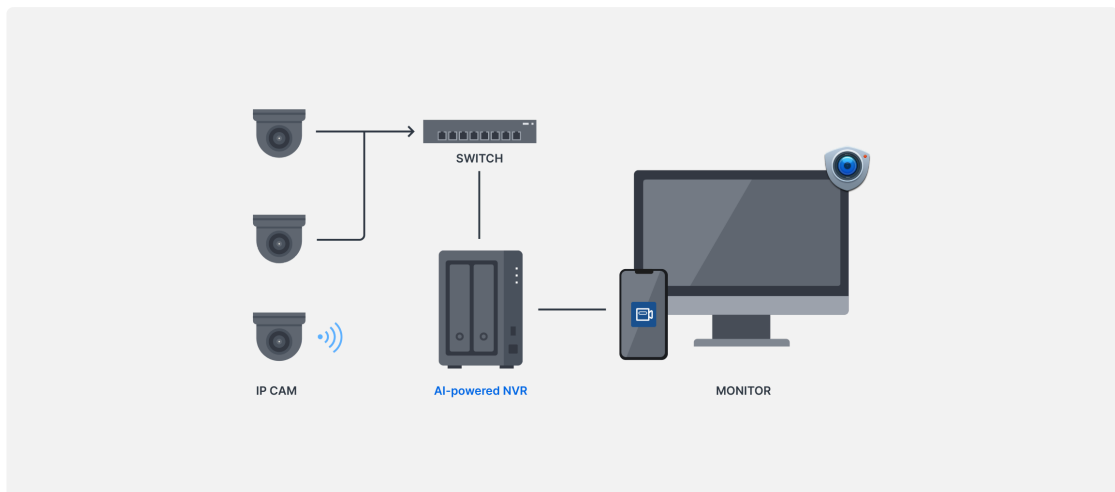

NAS

Turn your NAS into a network video recorder (NVR). Connect IP cameras to your NAS through the local network and access live feeds or recordings conveniently using web browsers, dedicated clients, and mobile apps. <https://sy.to/hsspssso>

AI-powered NVR

React to security events faster with Synology Deep Learning NVR DVA1622. Designed for home use, it notifies you immediately when AI-powered video analytics tasks detect events. A built-in HDMI port makes monitoring even easier. <https://sy.to/hsspdva>

Effective monitoring

Get the information you need from your home surveillance system with Surveillance Station's suite of effective monitoring tools. From basic camera management to advanced surveillance analytics¹, Synology has the perfect solution to protect what you value the most.

① People detection

Receive an alert when unexpected guests enter your property and get ready to meet them beforehand.

② Motion detection

Get notified when someone shows up on your doorstep to prevent damage or theft, such as of packages.

③ Intrusion detection

Protect weak spots such as backyards and rooftops. Get notified of possible break-ins with advanced motion detection.

④ Sound detection & two-way audio

Automatically start recording when sounds are detected outside, talk to visitors from inside, or get alerted when your child needs you.

⑤ Vehicle detection

Scan for the wrong vehicles parking in your driveway and take action in time.

⑥ Camera occlusion & tampering

Receive alerts when cameras go offline or get blocked by objects or paint.

Home Mode

Adjust the security level of your home by switching camera modes manually, on a schedule, or automatically when you leave.

DS cam

DS cam is the mobile extension of Surveillance Station. Monitor the situation at home from anywhere and control the cameras manually from a single app. <https://www.synology.com/surveillance/feature/mobile>

Peace of mind

Access cameras remotely through a fully featured mobile interface to check in on your family and pets.

Be the first to know

Choose specific events you want to receive notifications about and review footage the moment you get an alert.

LiveCam

Use your phone as a (temporary) IP camera and store the video footage both locally and to Synology NAS. <https://www.synology.com/surveillance/feature/mobile/live-cam>

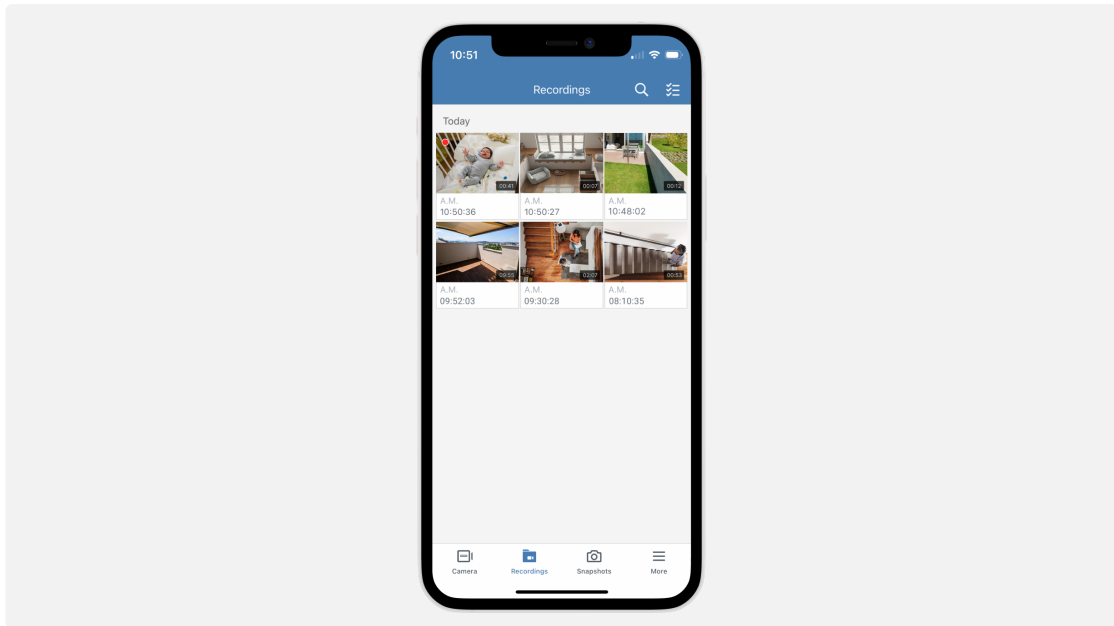

Portable IP camera

Use any available phone to set up temporary video surveillance during renovation work, a garage sale, or a garden party.

Secure video storage

Ensure access to footage in case the recording phone is erased, damaged, or lost.

Surveillance in the cloud

Enable dual recording to C2 Surveillance to automatically save camera streams to the cloud. Retrieve and view important footage directly from the online dashboard, even if the recording server is stolen or physically damaged, while resting assured that your data is protected by end-to-end encryption. <https://sy.to/hsspc2s>
